37 Years One Mission

The right products.
At the right place.
With the right support.

*This is the
United Central Story*

UNITED CENTRAL
INDUSTRIAL SUPPLY®

Proud Past, Bright Future

Through hard work and dedication since 1974, United Central Industrial Supply has been providing mine operators throughout North America with the highest quality supplies, regional rebuild and repair services, instrument repair and cable/cable repair services.

From the beginning, we have set ourselves apart from competitors by:

- > Delivering the products that customers need, when they need them
- > Servicing our customers with unmatched efficiency
- > Establishing exclusive relationships with leading manufacturers
- > Assembling a product management team that offers outstanding sales support and technical expertise

Our ability to lower a mine's cost per ton comes from the wide range of products and technical support we offer. This blend of products supplied by more than 1,100 manufacturers along with our unmatched customer service, have been the cornerstone of our success.

Product Management Team

We offer the right combination of products, technical expertise gained through field experience, and onsite training and inventory management to help you maximize mine level productivity.

With our Product Management Team averaging more than 30 years of industry experience, we are poised to help you select the ideal products to meet your needs. We concentrate our focus on: communications devices, electrical gear and components, and electronics, gas detection, material handling, mine rescue, power transmission, safety, and ventilation products, as well as breathing apparatus and rescue chambers to keep you operating efficiently.
